

WEEK 2 – CORE BUILD DOCUMENTATION

AI Idea Forge

AI Product Discovery Platform

Topic: High-Level UI/UX Design Concepts

Team: Batch 4 – Group 8

Date: August 1, 2026

Project Overview

Purpose

Guide early-stage concepts to validated business concepts via AI-assisted discovery.

Target Users

Startup founders, student entrepreneurs, PMs, and innovation teams.

The Problem

Users are time-constrained, lack formal research training, and struggle to format credible findings for investors.

Design Objectives

- Reduce validation time from days to minutes.
- Build trust via AI transparency.
- Deliver presentation-ready insights.

Design Philosophy

AI-First Experience

UI mirrors the AI's workflow.

Minimal Cognitive Load

Short labels, clear states.

Progressive Disclosure

Depth revealed in layers.

Modern SaaS Design

Familiar enterprise layout.

Consistency

Predictable mechanics.

Technical SaaS

Familiar enterprise layout.

Consistency

Predictable mechanics.

Accessibility

Multi-sensory indicators.

Visual Feedback

Continuous system response.

Responsive Layout

Flexible grid scaling.

Landing Page Design

- 1 Hero Section:** Split-color headline focusing immediately on outcomes.
- 2 Call-to-Action (CTA):** High-contrast, dual placement for maximum conversion.
- 3 Visual Hierarchy:** Left-to-right reading pattern.
- 4 Discovery Galaxy Preview:** Mental model teaching tool.
- 5 Trust-Building Elements:** Checkmarked capability statements.
- 6 Conversion-Focused Design:** Minimal navigation to keep focus.

Discovery Galaxy

Dashboard Design

Dashboard-First Workflow: Direct, immediate access to active analyses.

KPI Cards: Scan-friendly, compact metrics.

Metrics Grouping: Thematic organization.

Data Visualization: Visual scores replace raw numeric dumps.

Decision Support: Prominent 'Action Needed' flags.

Personalized Insights: Context-specific recommendations.

Visual Design System

Color Strategy

Background

Primary

Positive

Warning

Typography

Heading 1

Heading 2

Body copy. Clean, geometric sans-serif for high scanability.

Icons

Real-world associations for immediate recognition; strict family consistency.

Components

Primary Action

Modular rounded cards; contrast-weighted action buttons.

User Experience Principles

Design Workflow

Key UI Components

Cards: Soft elevation, subtle borders, uniform padding.

Buttons: Contrast-weighted hierarchy.

Status Badges: Pill-shaped containers combining color, icon, and text.

Navigation: Persistent, icon-led left-hand rail.

Progress Indicators: Circular rings and linear bars.

AI Agent Nodes: Interactive circular action points.

Overall Design Outcome

**Balancing an ambitious,
expressive visual style
with the absolute clarity
and usability expected
of a professional
decision-support
product.**

Making the Invisible Visible

UI transforms hidden AI reasoning into a transparent, trustworthy co-pilot.

Taming Complexity

The interface simplifies high-level business analysis via rigorous progressive disclosure.

Empowering Innovators

Gives early-stage founders the immediate confidence to validate and pitch their ideas.
